Week 10 Recap: From Tactics to Enterprise Policy

This week traced a complete path from recognizing an individual manipulation attempt to the organizational policy that protects against it at scale.

Dominic Yeakel | 10/9/2026

1 Day 1: Recognizing the Tactics

Day 1: Recognizing the Tactics

We studied phishing, pretexting, baiting, and tailgating, and crafted realistic training scenarios based on each. This gave us the specific patterns to recognize and defend against.

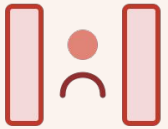

Phishing

Pretexting

Baiting

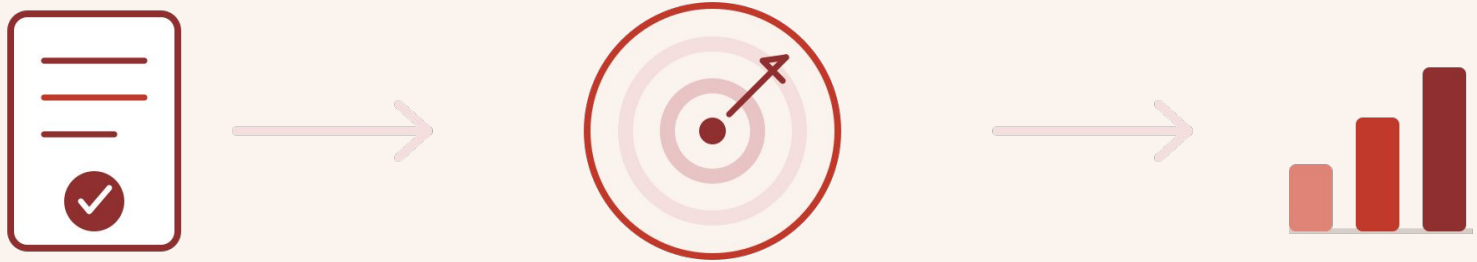

Tailgating

2 Day 2: Building a Formal Response

Day 2: Building a Formal Response

We built a mitigation plan, designed a phishing simulation program, and learned to measure effectiveness through real metrics. This turned recognition into an organized, testable program.

Mitigation Plan

Simulation Program

Real Metrics

3 Day 3: Governing the Whole Organization

Day 3: Governing the Whole Organization

We studied the policies, enforcement, audits, and secure communication channels that operate above any single team's plan. This sets up next week's deeper applied case work on exactly this material.

CARRYING THIS FORWARD

Recognizing one attempt and governing an entire organization are the same discipline, just at different scale.
