Linux Command	Description	Powershell Command	Description	Linux Flag	Description	Acronym	Description	Linux Syntax	Description
ls	List files	New-ADUser	Creates a new user account in	-l	Shows detailed listing	ADDS	Active Directory Domain Services	>	Redirect output to a file (overwrite)
pwd	Show working directory	Search-ADAccount	Finds accounts matching specific criteria	-a	Lists all files	DAC	Discretionary Access Control	>>	Redirect output to a file (appends)
cd	Change directory	Disable-ADAccount	Disables a user (or computer) account without deleting it	-h	Shows sizes of files	MAC	Mandatory Access Control	<	Redirect input from a file
touch	Create empty file	Get-ADUser	Retrieves information about existing user account(s)	-r	Deletes a folder and everything in it	PAM	Pluggable Authentication Module	|	Pipe output of one command into another
mkdir	Create directory	netstat	Displays open network sockets, routing tables, and a number of network interface and network protocol statistics	-f	Deletes without asking to confirm	LDAP	Lightweight Directory Access Protocol	&&	Run second command only if first succeeds
rmdir	Remove empty directory	ipconfig	Displays all current TCP/IP network configuration values and refreshes Dynamic Host Configuration Protocol (DHCP) and Domain Name System (DNS) settings	-v	Prints what it copied	FSMO	Flexible Single Master Operations	||	Run second command only if first fails
rm	Delete file			-i	Asks before overwriting	DNS	Domain Name Server	.	Current directory
cp	Copy file			-p	Creates nested folder in one go	DHCP	Dynamic Host Configuration Protocol	..	Parent directory
mv	Move/rename			-n	Shows line numbers of matches	FSRM	File Server Resource Manager	~	Home directory
tree	Show directory tree			-e	Prints a and b on separate lines	NTFS	New Technology File System	/	Root directory
stat	File metadata			-c	Counts matching lines	ACL	Access Control Lists	-	Previous directory
basename	Remove path & show filename			-w	Matches only the exact word “cat”	LSM	Linux Security Module	*	Matches any characters
dirname	Show parent directory			-R	Lists directory tree recursively (list all files in a directory tree)	APT	Advanced Persistent Threat		
file	Show file type					CVE	Common Vulnerabilities and Exposures		
ln	Create link					UFW	Uncomplicated Firewall		
realpath	Show absolute path					SUID	Set User ID		
shred	Secure file delete					SGID	Set Group ID		
find	Search files					MFA	Multi-Factor Authentication		
locate	Search indexed files					AGDLP Model	Accounts, Global Groups, Domain Local, Permissions		
cat	Dumps file content into CLI					GPO	Group Policy Object		
grep	Search for strings in text files					GPMC	Group Policy Management Console		
head	Extract top lines from files					OU	Organizational Units		
tail	View end of text files					NIST	National Institute of Standards and Technology		
ping	Network troubleshooting					FGPP	Fine-Grained Password Policies		
netstat	Reveals network connections					DS	Directory Service		
pushd	Changes directory and adds previous directory to stack					AD	Active Directory		
popd	Removes the top directory from the stack and takes you back					SRP	Software Restriction Policies		
chmod	Modifies the permission bits (read, write, execute) for the owner, group, and others					RPC	Remote Procedure Call		
chown	Modifies the user and group ownership of a file or directory					UAC	User Account Control		
ss	Used to troubleshoot connectivity issues, monitor open ports, and analyze network traffic					NLA	Network Level Authentication		
ps	Provides a snapshot of the current processes running on the system					RDP	Remote Desktop Protocol (port 3389)		
setfacl	Set ACL list					PAW	Privileged Access Workstation		
getacl	Get ACL list					LAPS	Local Administrator Password Solution		
usermod	Modify existing user account attributes					CIS	Center for Internet Security		
userdel	Removes the account entry					CIS-CAT	CIS Configuration Assessment Tool		
touch	Used to create empty files or update timestamps on existing files.					SCT	Microsoft's Security Compliance Toolkit		
systemctl	Controls systemd, the init system and service manager					sMSA	Standalone Managed Service Accounts		
apt	The package manager for Debian-based distros					gMSA	Group Managed Service Accounts		
sysctl	Views and modifies kernel parameters at runtime					NTLM	New Technology LAN Manager		
getenforce	Shows the current mode SELinux is running in					LSASS	Local Security Authority Subsystem Service		
setenforce	Changes the SELinux mode between Enforcing and Permissive					LSA	Local Security Authority		
						SMB	Server Message Block		
						WSUS	Windows Server Update Services		
						SID	Security ID		
						TPM	Trusted Platform Module		
						PCR	Platform Configuration Register		
						VMK	Volume Master Key		
						FVEK	Full Volume Encryption Key		
						SRK	Storage Root Key		
						BIOS	Basic Input/Output System		
						UEFI	Unified Extensible Firmware Interface		

AES	Advanced Encryption Standards
EFS	Encryption File System
FEK	File Encryption Key
DRA	Data Recovery Agent
DDF	Data Decrption Field
DSC	Desired State Configuration
ASR	Attack Surface Reduction
LGPO	Local Group Policy Object
TLS	Transport Layer Security
DFS	Distributed File System
JEA	Just Enough Administration
WAC	Windows Admin Center
RSAT	Remote Server Administration Tools
VBS	Virtualization-Based Security
VM	Virtual Machine
TCB	Trusting Computing Base
RBAC	Role-Based Access Control
KVM	Kernel-based Virtual Machine
FDC	Floppy Disk Controller
VDI	Virtual Desktop Infrastructure
IaaS	Infrastructure as a Service
HSM	Hardware Security Modules
SLA	Service Level Agreement
ARP	Address Resolution Protocol
JIT	Just-In-Time
NUMA	Non-Uniform Memory Access
TPS	Transparent Page Sharing
EPT/NPT	Extended/Nested Page Tables
NAS	Network-Attached Storage
SAN	Storage Area Networks
NFS	Network File System
NIC	Network Interface Card
DRS	Distributed Resource Scheduler
OSPF	Open Shortest Path First
ICMP	Internet Control Message Protocol
SNMP	Simple Network Management Protocol
HSTS	HTTP Strict Transport Security
SSL	Secure Socket Layer
CRL	Certificate Revocation List
CSR	Certificate Signing Request
OCSP	Online Certificate Status Protocol
SAN	Subject Alternative Name
CA	Certificate Authority
TDE	Transparent Data Encryption
PKI	Public Key Infrastructure
DEK	Database Encryption Key
BYOK	Bring Your Own Key
CMK	Customer Master Keys
IAM	Identity Access Management
PCI DSS	Payment Card Industry Data Security Standard
ECC	Eliptical Curve Cryptography
PQC	Post-Quantum Cryptography
ML-KEM	Module-Lattice Key Encapsulation Mechanism
ML-DSA	Module-Lattice Digital Signature Algorithm
SLH-DSA	Stateless Hash-Based Digital Signature Algorithm
NGFW	Next-Gen Firewall
DPI	Deep Packet Inspection
IPS	Intrusion Prevention System
SWG	Secure Web Gateway
FTPS	File Transfer Protocol Secure
SFTP	SSH File Transfer Protocol
UAR	User Access Review
TTP	Tactics, Techniques, and Procedures
ISAC	Information Sharing and Analysis Centers
MTTD	Mean Time To Detect
CVSS	Common Vulnerability Scoring System
SOAR	Security Orchestration, Automation, and Response

MTTR	Mean Time To Respond
TPRM	Thrid-Party Risk Management
SOC	Security Operations Center
BEC	Business Email Compromise
SPL	Splunk Processing Language
